

Tips & Tricks

December 2006

Use the following steps to assist in changing your internet settings to run Paragon with your current or new PC

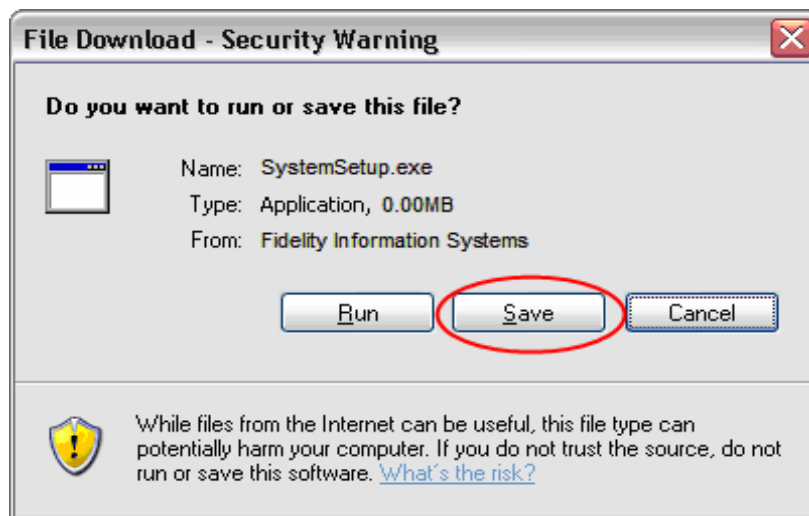

For all Paragon 3 users, we recommend using the Paragon System Setup Utility program.

First step:

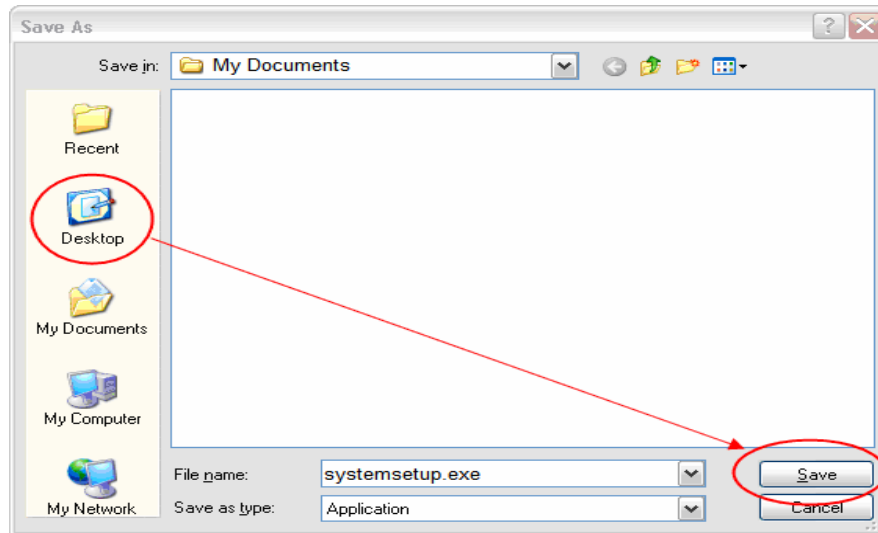

Open up internet explorer and navigate to your Paragon 3 Login page. You will then need to click on the “system checker” button. That will take you to the Fidelity web page where you can click the “download” button to begin the process.

Instructions for Download

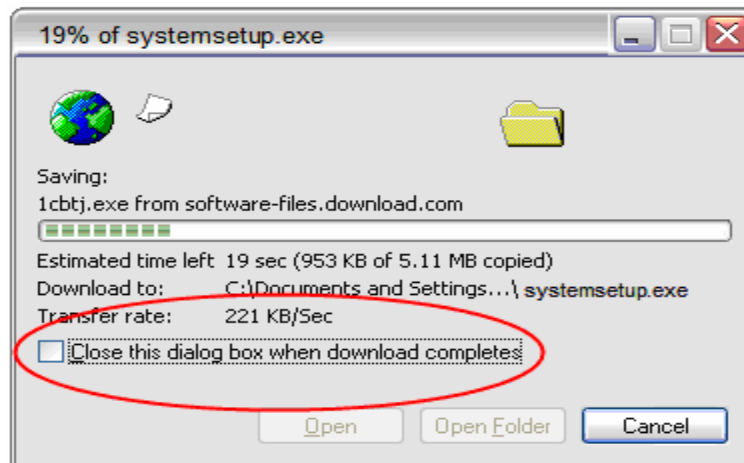

1. Select the download button found at the bottom of the page.
2. Select the Save option on the pop up window.

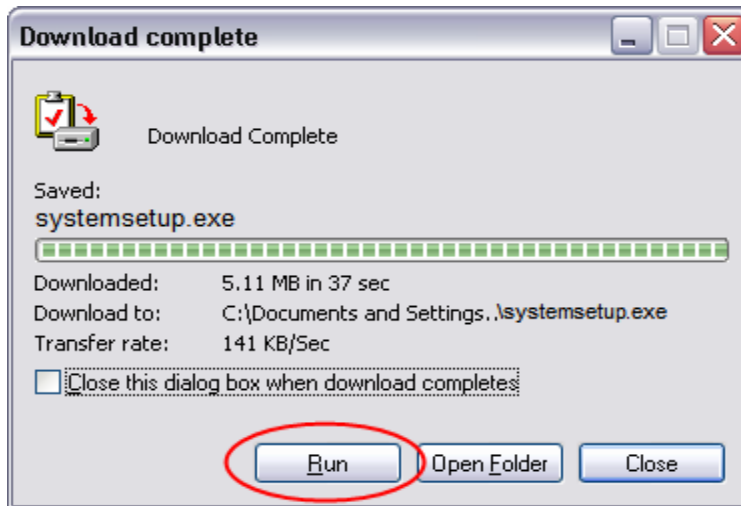

- Another window will open. Select the Desktop icon on the left side then select the Save button.

- Uncheck "Close this dialog box when download completes" if it is checked. If it is not checked then proceed to number 5.

- When the download has completed left click on the Run button.

[Download](#)

If you see a bar at the top of your Internet Explorer advising that “To help protect your security, Internet Explorer has restricted this file from showing Active Content that could access your computer.” You will need to right click on the bar and select Download File.
